

Laurie took the initiative to assist me with general business advice, when he saw I was having difficulty with a complex business situation.

Laurie was able to quickly grasp the situation and see a way forward which had eluded me previously. He explained the process of restructuring my business interests and the procedures to follow to make that happen, in an honest and up front way which made sense. He then guided me through making the difficult decision before me, referred me to expert assistance to tidy the legal requirements involved, and mentored me through the process of building a vibrant and successful business.

Laurie's advice and support has resulted in avoiding what could have become a financial disaster, and instead I am now able to focus on the business where my passion lies – Club One Fitness, which is now a flourishing 24/7 operation, involves less man-hours, with turnover growth close to 300%, and poised for the next stage of growth. More importantly, the stress and financial restrictions I was burdened with have gone, and I am now making money and am able to enjoy it.

I can't thank you enough Laurie for your assistance.
